

Stress-free separation of pre-scored PCBs

The MAESTRO 4S separates both large and small PCBs quickly, economically and without stress. Cutting with only a single traverse of the pre-scored groove causes tensile and compressive stresses that can damage sensitive components near the groove. Even a second traverse of the groove accompanied by an adjustment of the blade distance substantially reduces the tensile and compressive stresses. This significantly improves the quality of the populated PCBs.

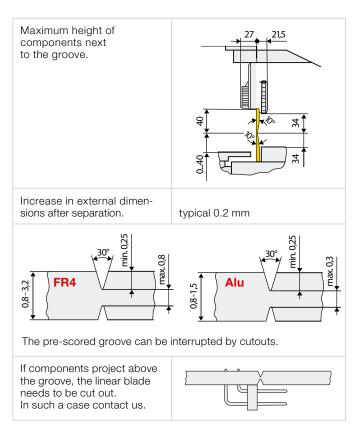

The most important features

- The blade distance is entered on the operating panel and its adjustment is motor-powered.
- Up to nine programs can be stored.
- The materials used for PCBs are FR4 and aluminum
- The continuously adjustable separation length is set with limit switches.
- The accumulated cutting performance is displayed for the purpose of scheduling preventive maintenance of the blade.

Material: FR4 1,5 mm, rest thickness ca. 0,6 mm

Technical Data	Technical Data		4S/600	
Separation type		Component side Solder side	circular blade linear blade	
Operation		optimized motor driven		
Separation speed		300/500 mm/s switchable		
Material		FR4, Aluminum		
Height of components		Solder and component sides up to 34 mm		
Continuously adjustable separation length		up to 450 mm	up to 600 mm	
Width of supporting table		200 mm		
Programming				
Start		Traverse to starting position		
Program	Program			
Separation steps	Separation steps		1-5	
Blade distance	Blade distance		0.9 mm up to 0.05 mm	
Key switch butto	Key switch button		Release program selection	
Cutting performance display		up to 99 km		
DEL	DEL		Reset step count	
Power switch		ON / OFF		
Foot switch	Foot switch		START Operation	
Safety switch	Safety switch		Emergency stop	
Voltage		100-240 VAC 50/60 Hz		
Emission sound pressure level		LpA < 70 dB (A)		
Temperature/	Operation	+ 5 - 40°C / 10 - 85%		
Humidity	Storage	+ 0 - 60°C / 20 -	80%	
not condensing	Transport	– 25 - 60°C / 20 -	80%	
Weight		38 kg	46 kg	
Height x Depth		434 x 425 mm		
Width		702 mm	852 mm	
Approvals		CE, FCC class A		

Conveyor belt

Conveyor Belt

WAESTRO AS

ND

The separated PCBs are placed individually on the conveyor belt, and transported out to the side of the machine. The speed is adjusted according to the size of the PCB. A light barrier at the end of the conveyor belt detects the arrival of PCBs and stops the belt.

Technical Data	450	600
Material conveyor belt	antistatic	
Direction of belt travel	to the right	
Belt speed	5/6/7/8/9 m/min.	
Light barrier	can be activated for belt stoppage	
Vertical clearance to linear blade	5 - 17 mm	
Maximum PCB width	200	mm
Weight	14 kg	
Width of belt	170 mm	
Length	1200 mm	1350 mm
Approvals	CE, FCC	class A

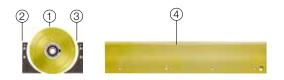

Various aluminum alloys are used in the manufacture of PCBs. We recommend submitting sample PCBs with the order in order to optimize the cutting geometry and for the correct adjustment of the circular blades.

The circular and linear blades must be precisely guided across the entire separation length in order to achieve stress-free separation and a long service life. The measuring system is mounted on a carriage for setting and regularly checking the parallelism.
